QUALITY AND ENVIRONMENTAL POLICY
ANODAL Sp. z o.o. Sp. k.

The main goal of business activity of ANODAL Sp. z o.o. Sp. k. is **anodising and colouring of aluminium** in a competitive manner, ensuring optimal quality and respect for the environment.

Paying special attention to quality and care for the environment, we set the following goals:

- identifying the needs and expectations of customers and research their satisfaction
- building partner relationships with clients
- proper selection and verification of suppliers and their deliveries
- providing adequate resources for the functioning of the organization
- ensuring and raising the competences of persons working under the supervision of an organization
- building awareness in the organization regarding the importance of quality and environmental protection activities
- analysis of the effectiveness of processes in the organization
- ensuring the necessary level of occupational health and safety, as well as fire protection.

During the implementation of the above objectives, we commit ourselves to:

- improving the effectiveness of organizational processes
- environmental protection, including pollution prevention
- the use of rational production processes having an impact on the environment
- meet applicable legal and other requirements
- continuous improvement of the Integrated Management System (IMS) in accordance with ISO 9001:2015 and the environmental management system in accordance with ISO 14001:2015 in order to improve the quality and environmental effects of operations.

This quality and environmental policy is communicated to all persons working under the supervision of the organization and available to interested parties.

On behalf of the top management, I declare taking responsibility for the effectiveness of IMS.

CEO

Marcin Sujecki
